***Continued Prosecution Application***

The Request for Continued Examination (RCE) filed on 5/11/2006 under 37 CFR 1.114 based on parent Application No. 10/697,931 is acceptable and a RCE has been established. An action on the RCE follows.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Marotta (5,600,889).

Marotta discloses a pizza box (40) and lid support (26) in the embodiment of Figure 11 comprising a pizza box (40) retaining a pizza (46) and a lid support (26) placed in the pizza box. The lid supporting comprising a support platform (12) supported above the pizza by at least one support leg (30) and prevented a lid (44) of the pizza box from contacting the pizza, and a handle (14) having an edge extending downwardly and outwardly from the support platform which is considered equivalent to a cutting edge as claimed. The edge of the handle of the lid support of Marotta is inherently capable of being used as the cutting edge.

3. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Beck et al. (4,877,609; hereinafter Beck'609). Beck'609 discloses a pizza box (10, 12, 14) and lid support (30) comprising a pizza box (14) retaining a pizza (20) and a lid support (30) placed in the pizza

box. The lid supporting comprising a support platform (40, 42) supported above the pizza by at least one support leg (60) and prevented a lid (12) of the pizza box from contacting the pizza, and the support leg having an edge (along portion 64 in Figure 2) extending downwardly and outwardly from the support platform which is considered equivalent to a cutting edge as claimed. The edge of the support leg of the lid support of Beck'609 is inherently capable of being used as the cutting edge.

4. Claims 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Montesi (3,877,143). Montesi discloses a implement (10) comprising a support platform (14), at least one leg (12, 16) supporting the support platform above a support surface and a cutting edge (28, 30, 40, 42) extending downwardly and outwardly from the support platform toward the support surface (Figures 1-3). The implement of Montesi is inherently capable of being as a lid support. As to claim 5, the support platform (14) includes a grasping member such that the support platform serves as a handle to use the cutting edge as a cutting implement.

5. Claims 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Fulton (1,612,367). Fulton discloses a implement (Figure 1) comprising a support platform (16, 17), at least one leg (the middle leg 15) supporting the support platform above a support surface and a cutting edge (an edge of the two outer legs 15) extending downwardly and outwardly from the support platform toward the support surface (Figure 1). The implement of Fulton is inherently capable of being as a lid support. As to claim 5, the support platform (16, 17) includes a

grasping member (17) such that the support platform serves as a handle to use the cutting edge as a cutting implement.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Montesi (3,877,143) in view of Steck et al. (6,694,619; hereinafter Steck'619). Montesi discloses the implement (10) as above having all the limitations as claim except for the grasping member being a hole in the support platform. Steck'619 teaches a cutting implement comprising a cutting edge (1) and a grasping member is a hole (2, Figure 1). It would have been obvious to one having ordinary skill in the art in view of Steck'619 to modify the implement of Montesi so the grasping member comprises a hole to facilitate grasping during using the implement.

8. Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fulton (1,612,367) in view of Montesi (3,877,143). Fulton discloses the implement (10) as above having all the claimed limitations except for the cutting edge (of the outer legs 15) being provided on a serrated support leg. Montesi shows a implement (10) comprising a support platform (14) and a serrated support leg 12, 16) having a cutting edge (28, 30, 40, 42) (Figures 1-3). It would have been obvious to one having ordinary skill in the art in view of Montesi to

modify the implement of Fulton so the cutting edge is provided on a serrated leg to facilitate cutting.

***Allowable Subject Matter***

9. Claim 3 is allowed.

10. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments with respect to 5/11/2006 have been considered but are deemed to be moot in view of the new grounds of rejection.
